<b>Office Action Summary</b>	<b>Application No.</b> 10/706,633	<b>Applicant(s)</b> TERAN ET AL.	
	<b>Examiner</b> Carolyn A. Paden	<b>Art Unit</b> 1761	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 22 & 23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 3-13, 15, 16 and 24-43 are allowed.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 17-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yang (4,832,975).

A closer review of Yang indicated that there should have been a rejection of claims 17-21 over Yang. Accordingly prosecution of this case continues.

Yang discloses tailored triglycerides with improved auto ignition characteristics. The composition contains an interesterified fat having a combination of medium chain triglycerides and long chain triglycerides in the relative amounts of those set forth in the claims (see example 1). Example VI shows mayonnaise having the required amount of triglyceride of claim 17 with egg yolk as a source of lecithin. Example VIII shows

margarine having the required amount of triglyceride of claim 19 with monostearate as a glyceride modifier. The claims appear to differ from Yang in the recitation of the preamble limitation that the product is a pan release composition. Although preamble limitations do not carry weight in product claims, margarine is often used as a pan release agent in the home. It would have been obvious to one of ordinary skill in the art to use the margarine of example VIII as a pan release agent. It is appreciated that lecithin is not mentioned as an emulsifier in the margarine preparation but lecithin is a well known substitute for other emulsifiers in margarine and 21 CFR 166.110 is relied upon for support of this assertion. It is appreciated that heat resistant lecithin is not mentioned but no difference is seen between this type of lecithin and standard lecithin.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carolyn A Paden whose telephone number is (571) 272-1403. The examiner can normally be reached on Monday to Friday from 7 am to 3:30 pm.
